

RFPD

Ruggedized Flat Panel Displays

Key Features and Benefits

- **Flexibility** – Offered in sizes from 6.4 to 46 inches and beyond, our RFPDs can be customized to your design requirements.
- **Durability** – Built to meet MIL standards, these ruggedized displays withstand the most rugged of military environments.
- **Proven performance** – Consistently receive top supplier rating scores for quality and delivery, ongoing for years.
- **ISO 9001:2015 Certified** – Our quality management system ensures excellence in design, assembly, and testing of electronic assemblies.

Custom designed to excel in challenging military environments.

Designed to meet the most rigorous military operational standards, including shock, vibration, EMI/EMC, and custom power interface. Our RFPDs stand as the pinnacle of reliability and durability. We have manufactured many different RFPDs tailored to the sizes and capabilities used aboard aircraft carriers, submarines, aircraft, military vehicles, as well as land-based applications.

RFPD

Ruggedized Flat Panel Displays

Custom Design

- Suitable for rack, panel, console, bulkhead, and VESA installations, offering adaptability in various settings.
- Common features: High-resolution, bonded with anti-reflective protective window, wide viewing angle, VGA, DVI-D, NTSC, and composite input.
- Additional options: Touch-screen, RS232 control, enhanced video (removes haze/fog for better visibility), panoramic viewing.

Unrivaled Quality and Service

- Our consistently high customer satisfaction ratings attest to our commitment to quality, on-time delivery, and being a top service provider.
- Our highly experienced and trained team has completed thousands of RFPD orders, large and small.
- Over 20 years of experience designing and manufacturing RFPDs make Epsilon Systems the vendor of choice for our valued customers.
